Research Highlight

DPM-Solver and DPM-Solver++ <ul style="list-style-type: none">SOTA training-free fast sampler for diffusion models, within only 10 to 20 steps (compared to the default 1000-step setting).Github Stars: 1k+. It also has been integrated into <i>Diffusers</i> library.Widely-used in various text-to-image diffusion models, such as stable-diffusion (v1, v2, XL and LoRA variants), DreamStudio, StableBoost, Stable-Diffusion-WebUI, Apple’s Core ML library, Stability-AI’s DeepFloyd-IF.	2022
ProlificDreamer <ul style="list-style-type: none">High-fidelity text-to-3D generation with solely 2D diffusion models. Greatly outperforms all previous works, such as Dreamfusion and Magic3D.Propose <i>variational score distillation</i>, a principled score distillation algorithm, suitable for both 2D and 3D.Project Page: https://ml.cs.tsinghua.edu.cn/prolificdreamer/	2023

Personal

- I was a bass singer in the Chorus of Tsinghua University with a vocal range of C2-F4 (where C2 is also known as “low C”). I won the **top ten campus singers competition of Tsinghua University** in 2019 by singing a famous jazz song *Autumn Leaves*. I love singing!
